Duct Temperature Sensors

QAM1612.020, QAM1630.020

Duct temperature sensor in air ducts

Passive sensor for acquiring the air temperature in air ducts.

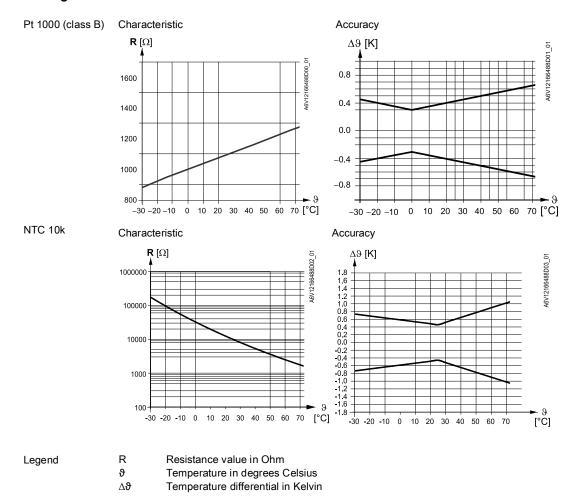

The duct temperature sensors are for use in ventilation and air conditioning plants as:

- Supply or extract air temperature sensors
- Limit sensors, e.g. for minimum limitation of the supply air temperature
- Reference sensors, e.g. for shifting the room temperature as a function of the outside temperature
- Measuring sensors, e.g. for measured value indication or for connection to a building automation and control system

Function

The sensor acquires the air temperature via its sensing element whose resistance changes as a function of the temperature. The signal is delivered to a suitable controller for further handling.

Sensing elements

Mechanical design

The duct temperature sensor consists of the following components:

- Two-sectional plastic housing comprised of base with connection terminals and removable cover (snap-on design)
- Immersion rod complete with sensing element

The connection terminals can be accessed after removing the cover.

Siemens

Type summary

Type reference	Immersion rod length	Sensing element
QAM1612.020	0.2 m	Pt 1000
QAM1630.020	0.2 m	NTC 10k

Ordering

When ordering, please give name and type reference, e.g.: Duct temperature sensor QAM1612.020.

Equipment combinations

All systems or devices capable of acquiring and handling the sensor's passive output signal.

Notes

Mounting

Mounting location

- For supply air temperature control: Downstream from the fan if the fan is located after the last air handling unit. Otherwise, after the last air handling unit with a minimum distance of 0.5 m
- For extract air temperature control: Always upstream of the extract air fan
- As a limit sensor for the supply air temperature: As close as possible to the air outlet into the room
- For dew point control: Immediately after the spray trap of the air washer The immersion rod must not touch the duct wall.

The sensor is supplied complete with Mounting Instructions.

Mounting positions

Not permitted

Mounting examples

The device is considered an electronic device for disposal in accordance with the European Guidelines and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

Functional data		
Operating range	-3070 °C	
Sensing element	Refer to Type summary [→ 3]	
Immersion rod length	Refer to Type summary [→ 3]	
Time constant	30 s at 2 m/s	
Dead time	<1s	
Measuring accuracy	Refer to Function [→ 2]	

Ambient conditions and protection classification			
Protection degree of housing	IP42 according to EN 60529		
Protection class	III according to EN 60730-1		
Environmental conditions			
Transport			
Climatic conditions			
 Temperature 	-2060 °C		
 Humidity 	595 % r.h.		
Operation			
Climatic conditions			
 Temperature (housing) 	050 °C		
Humidity (housing)	1090 % r.h.		

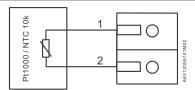

Standards, directives and approvals			
Product standard	EN 60730-1 Automatic electrical controls for household and similar use		
EU conformity (CE)	A5W00040629 *)		
Environmental compatibility	The product environmental declaration (A5W00146316A *) contains data on environmentally compatible product design and assessments (RoHS compliance, materials composition, packaging, environmental benefit, disposal).		

General		
Perm. cable lengths	Refer to Data Sheet of the relevant controller	
Electrical connections screw terminals for	1 × 2.5 mm ² or 2 × 1.5 mm ²	
Cable entry	Sealing ring	
Materials and colors		
Immersion rod	Stainless steel	
Base	PC (light-grey)	
Cover	PC (light-grey)	
Mounting flange	PC+GF10 (light grey)	
Packaging	Corrugated cardboard	
Weight including package		
QAM1612.020	Approx. 0.154 kg	
QAM1630.020	Approx. 0.154 kg
